FOR CANON

With constant shooting, flash usage, image review and playback, especially when you have access to additional memory, your standard battery alone will not usually be sufficient.

Works for Canon: EOS 450D, EOS 500D, EOS 1000D, EOS Digital Rebel T1i, EOS Rebel XS, EOS Rebel XSi, Kiss X3 Digital Digital Camera.

A battery loses power in cold weather, and can become too cold to operate the camera. Keeping a spare battery warm in your pocket to maximize battery power and periodically switching the cold battery for the warm one can significantly enhance battery performance.

Memory Free! This LP-E5 can be charged at any time without harm, even if it already has a partial charge and can be typically charged over 1000 times.

CAMERA BRACKETS/CADDIES/RIGS

The Vidpro Deluxe LED Digital Video Light Kit includes everything you need to start illuminating your subjects with 5600K (daylight) color-balanced LED light. Composed of an array of 28 LEDs, the light attaches to your camcorder or DSLR camera via a standard shoe mount.

The kit's adjustable bracket offsets the light and facilitates its attachment to any standard 1/4"-20 thread, whether it's at the bottom of a camcorder, on a DSLR rig, or elsewhere. The included pair of rechargeable AA batteries powers the light for up to 3 hours. An AC adapter is also included with the kit for recharging the batteries.

Enhances the color & clarity of your digital video and still images
LEDs run cooler and use less energy than comparably bright standard or halogen bulbs

CHARGERS WITHOUT BATTERIES

The Rayovac Charger comes with 2 AA and 2 AAA Pre-Charged Rechargeable NiMH Batteries. These batteries hold up to about 80 percent of their charge even when they've not been used for six months. You can recharge these batteries up to as many as 500 times. The Rayovac Battery Charger can charge four AA or four AAA NiMH or NiCD rechargeable batteries at a time. The batteries charge overnight so your devices are ready for use the next day. The AA batteries allow you to take up to 300 photos in a fully-charged state. This environmentally friendly charger uses smart charger technology that stops the charging process automatically when the batteries are fully charged.
